

OIL AND GAS

Iracore's ARMOR-CORE urethane-lined pipe system has been extending frac services equipment since 2012. Our ARMOR-CORE-lined pipe and fittings have been field-proven on the following equipment:

Blender Trucks:

- C-pump Suction Spools
- Discharge Manifolds
- Neoprene-Lined Blender Tubs
- Denso Spools
- All Associated Pipe and Fittings

Missiles/Mono-Lines:

- Low-Pressure Piping and Manifolds
- Denso Spools

Acid Trailers:

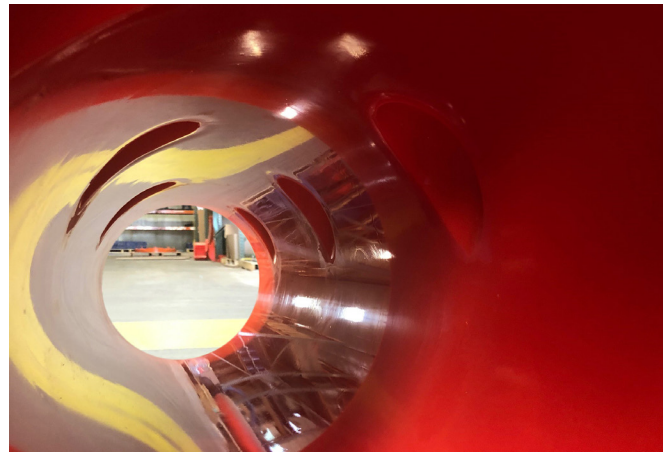

- Bromobutyl Rubber-Lined Pipe and Fittings

The average mild steel service life for fracking services equipment is between 200-400 million pounds of sand conveyed. Our ARMOR-CORE-lined pipe systems have been tracked above 6 billion pounds of sand conveyed without pinhole failures.

In addition, Iracore provides engineering services to assist in designing urethane-lined pipe systems to ensure proper efficiencies and optimization.

Learn what ARMOR-CORE can do to extend the life of your frac services equipment by visiting iracore.com

Proven to Outperform

Since 1957, Iracore has been proven to outperform in our clients' toughest wear environments by leading the innovation, design, and manufacturing of engineered products, including lined pipe.

Studies have shown time and time again how Iracore materials deliver higher value than metal and other polymer materials.

Iracore is the manufacturer of elastomer wear products for abrasion and corrosion applications:

Urethane – Cast and Spin Cast:

- Iracore develops and compounds custom polyurethane materials for specific conditions

Rubber – Vulcanized and Cold Bond:

- Soft Natural Gum Rubber (NGR)
- Neoprene 0555*
- Moderate Oil Resistance (MORS)
- Chlorobutyl / Bromobutyl (Butyl)
- Hot Process Water and other custom applications

Iracore™-Lined Pipe:

- Specifically developed for cold-temperature and high-wear application.

* Highest wearing Neoprene for use in Oil Sands – rated by the NRC
